

## The Alpha Bed™

Our Alpha Bed™ system is a lightweight, universal, structural steel bed frame with double overlap steel stiffeners. The design is complete with our fold-away leg system and is designed to exceed the strength of wood or aluminum as well as residential and commercial specifications.

Our Alpha Bed™ frames are made for use with Single, Double, Queen, or King size beds and the versatility of the design gives the user the option to mount the frame in the vertical or horizontal mode.

Spring Balance Lift Mechanism

Trip-Free© Fold-Away Legs

### Benefits

All sizes of the Alpha Bed™ system include our heavy duty, universal, easy-operation lift mechanisms. Designed for every day use, this mechanism allows for varying spring combinations in order to balance all bed sizes Single through King, and creates easy fingertip operation. Limited lifetime warranty on manufacturers defects. *Misuse, abuse, or damage by misapplication are not covered.*

#### Steel Bed Frame

- Small Footprint - Less than 41cm with mattress
- Heavy Duty, Precision Manufactured.
- Mounts vertically or horizontally.

#### Spring Balance Lift Mechanism

- Heavy Duty mechanism tested to thousands of cycles.
- Adjustable Tension to Balance
- Needs only 1" of cabinet width on each side - very compact!

#### Trip-Free© Fold-Away Legs

- Feet tucked under bed so they don't catch feet.
- Easily rotates over mattress to put away.

### Installation

Alpha Bed™ systems are not for DIY assembly. The bed must be assembled and installed into a purpose built cabinet by a competent Carpenter/ Joiner using the appropriate technical specification.

**Please note:** wall bed frames and mechanisms are illustrated with cabinets and doors (purchased separately) for demonstration purposes only - for matching cabinets and wall bed furniture, please refer to our furniture product sheet.
